MARKET QUOTATIONS

FEDERAL SOIL BUILDING PRACTICE PAYMENTS ENCOURAGE INCREASED USE OF GRASSES THIS YEAR.

Officially approved soil-building practices for 1937 Agricultural Conservation Program were announced recently, and the following rates of payment were approved:

1. Seedings of adapted legumes on cropland, providing a good stand exists at the time of checking performance:

Alfalfa.....	\$2.50	per	acre
Red Clover, sericea and white clover	2.00	"	"
Alsike and mammoth clover.....	1.50	"	"
Lespedeza	1.50	"	"
Legume mixtures or mixtures of legumes and perennial grasses, containing 50% or more of alsikeclover, mammoth clover, red clover, white clover, alfalfa, sericea, or lespedeza, or any combination of these legumes	1.50	"	"
Biennial or annual sweet clover, vetch, and crimson clover	1.00	"	"
Legume mixtures or mixtures of legumes and perennial grasses which contain 50% or more biennial or annual sweet clover, vetch, or crimson clover, or a 50% combination of any of the mentioned legumes.....	1.00	"	"

2. Seedings of adapted perennial grasses on cropland or non-crop pasture land providing a good stand exists at time of checking performance:

Bluegrass, crested wheat grass, slender wheat grass, and western wheat grass	\$2.00	per	acre
Bromegrass, orchard grass, and permanent pasture mixtures of grasses or grasses and legumes.....	1.50	"	"
Redtop, timothy, and permanent pasture mixtures of grasses or grasses and legumes	1.00	"	"

With stocks of domestic clovers and alfalfas scarce and prices relatively high, the above payments should encourage the increased use of other legumes and grasses which are still comparatively moderately priced.

LATEST REPORT FROM WASHINGTON STATES:

“A study of program as authorized to date indicates that while their sowing European Red Clover could not qualify in the north central region for the general conserving payment of three dollars an acre nor for the soil-building payment of two dollars for sowing adapted red clover seed they could qualify for the general diversion payment of six dollars for diverting from a soil depleting crop provided they complied with the other provisions of the program”

FARM SEEDS

In Mixed Car Shipments Save You Money on Your Freight Charges

Globe Feeds and Pine Tree Seeds can all be utilized in making up the minimum weight of a mixed carload shipment to certain shipping points. The respective carload freight rates apply on each commodity in the car. Write to us for full particulars concerning your shipping point.

Many merchants buy some seed from one point, feed from another point and pay local freight charges on each shipment. Combining orders and concentrating on Globe Feeds and Pine Tree Seeds has meant a big saving to many merchants. Possibly the same plan would be beneficial to you.
